INFOGRAPHIC: MARKET OPPORTUNITY

1. Executive Summary

Problem Statement

The Tanzanian rental market is plagued by inefficiency and exploitation:

- Informal brokers dominate the market
- High commissions and viewing fees
- No regulatory oversight or guarantees
- Time-consuming property search process

Our Solution

Panga is a digital platform that transforms property rental:

- Direct tenant-to-listing connections
- Verified property information
- Digital contract facilitation
- AI-powered recommendations

Revenue Model:

- Annual subscription (TZS 10,000)
- Facilitation commission (up to 5%)
- Premium listing features
- Value-added services

2. Business Model

Core Features

- Verified property listings with photos
- Location-based search with transport info
- Digital lease agreement signing
- Secure messaging system
- Dispute resolution framework
- Field agent verification network

Operational Model

Trained field agents equipped with rugged Android devices collect and verify property data:

- Paid per verified listing
- Responsible for owner onboarding
- Geographically distributed teams

Revenue Streams

Value-Added Services

- Rental insurance packages
- Tenant screening services
- Document verification
- Premium listing enhancements

3. Marketing Strategy

Celebrity Ambassador Program

- 2-5% equity for national celebrity
- Television, radio, and digital campaigns
- Social media engagement
- Event appearances and roadshows

Digital Campaign

- "Modern Renting Simplified" theme
- Youth influencer collaborations
- Targeted social media advertising
- YouTube, Instagram, Facebook focus

Community Engagement

- University partnerships
- NGO collaborations
- Community workshops
- On-ground marketing teams

Target User Acquisition

Brand Identity

- Field agent branded uniforms
- QR-code promotions
- Strategic mall partnerships

4. Technology Stack & Infrastructure

React Native

React.js

Node.js

Express.js

PostgreSQL

Firebase Auth

Frontend

- Cross-platform mobile apps (React Native)
- Responsive web portal (React.js)
- Admin dashboard with analytics
- Field agent data collection app

Backend

- RESTful API architecture
- Node.js with Express.js
- PostgreSQL database
- Firebase Authentication

Cloud Infrastructure

- AWS or Google Cloud hosting
- AWS S3 for media storage
- Cloudflare CDN and security
- Automated scaling solutions

CLOUD ARCHITECTURE DIAGRAM

5. AI-Powered Matchmaking & Search

How It Works

1. Capture user preferences (budget, location, features)
2. Encode preferences into feature vectors
3. Calculate similarity scores with listings
4. Rank and recommend best matches
5. Continuously refine with user feedback

AI MATCHMAKING
VISUAL

Technical Implementation

```
from sklearn.metrics.pairwise import cosine_similarity
import numpy as np

# User preferences vector
user_vector = np.array([[0.8, 0.5, 1.0]])

# Property feature vectors
property_vector = np.array([
    [0.9, 0.4, 1.0], # Property 1
    [0.5, 0.9, 0.5] # Property 2
])

# Calculate similarity scores
similarity_scores = cosine_similarity(user_vector, property_vector)

# Rank properties by match score
ranked_properties = np.argsort(similarity_scores[0])[::-1]
```

Dynamic updates based on user interactions ensure increasingly relevant recommendations.

7. Product Roadmap (Year 1)

Q1	Q2	Q3	Q4
• MVP development • Ambassador onboarding • Initial PR launch	• Dar es Salaam pilot • AI recommendation testing • Agent network deployment	• Video walkthroughs • Digital contracts • Expand to Mwanza/Arusha • Monetization launch	• Dispute resolution tools • Student partners program • Insurance integration

9. Financial Forecast (Year 1)

Revenue Projections

- **Target Users:** 10,000
- **Subscription Revenue:** TZS 100,000,000
- **Commission Revenue:** TZS 20,000,000
- **Total Revenue:** TZS 120,000,000

Expense Breakdown

- **Development:** TZS 40,000,000
- **Marketing:** TZS 20,000,000
- **Field Agents:** TZS 15,000,000
- **Admin/Legal:** TZS 5,000,000
- **Total Expenses:** TZS 80,000,000

Projected Net: TZS 40,000,000 surplus

10. Closing Note

Panga Inc. seeks to redefine Tanzania's rental landscape by replacing inefficient broker-based models with a transparent, user-focused digital platform.

Our Vision

- Make house hunting affordable and transparent
- Empower tenants and property owners
- Create a trusted national platform
- Expand to additional real estate services

Why Invest?

- Large, underserved market opportunity
- Scalable technology platform
- Experienced leadership team
- Clear path to profitability
- Positive social impact potential

FINAL VISION ART
