

Digitizing Dar es Salaam's Rental Market

You may already earn from rent. We propose to make every tenant worth *more*.

8M

Population

Dar es Salaam residents (2022 Census)

4.1M

Renters

51.1% of population rents homes

\$1B

Market Size

Annual rental market value

The Problem: Broken Rental System

Unregulated Dalalis

High fees, fraud, and inefficiency plague the current system. Tenants pay 1-2 months rent upfront with no guarantees.

Limited Digital Reach

Landlords lack proper screening tools and digital presence to reach quality tenants effectively.

No Transparency

Absence of centralized platform creates information gaps and market inefficiencies.

The Solution

01

Verified Listings

Through professional Field Operatives (FieldOps) ensuring quality and authenticity

02

Mobile + WhatsApp Access

Digital-first platform optimized for low-data environments

03

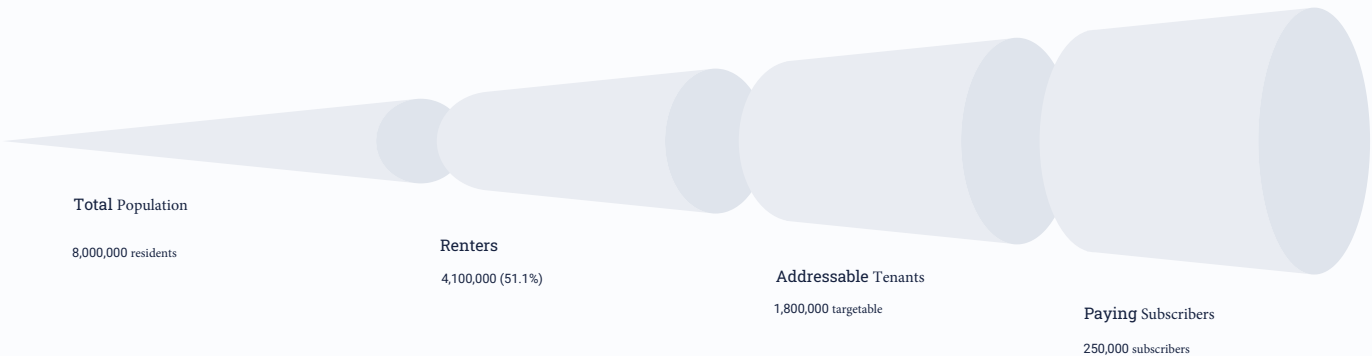

Multiple Revenue Streams

Tenant subscriptions (TZS 10,000/year) + 5% commission on monthly rent

04

Data Monetization

Heatmaps, pricing insights, and neighborhood demand analytics

Transform Rent Into Recurring Digital Revenue

New Revenue Layer
Add digital income streams to existing monthly rent from your 500+ residents

Scale Across Dar
Earn from 10,000 tenants in year one as proof of model viability

Data Ownership
Control the data backbone of Tanzania's entire rental economy

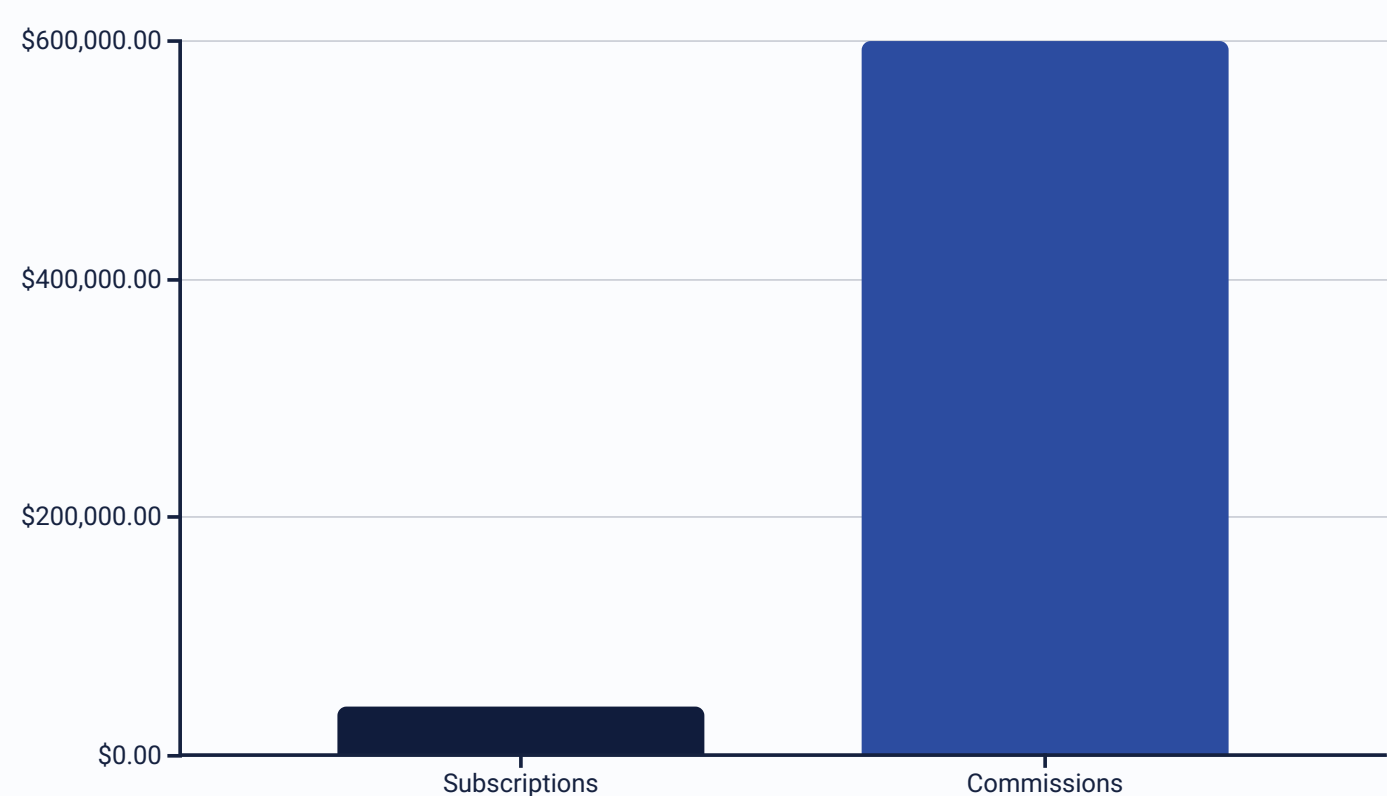

Modest Pilot Investment

We are not asking for millions upfront

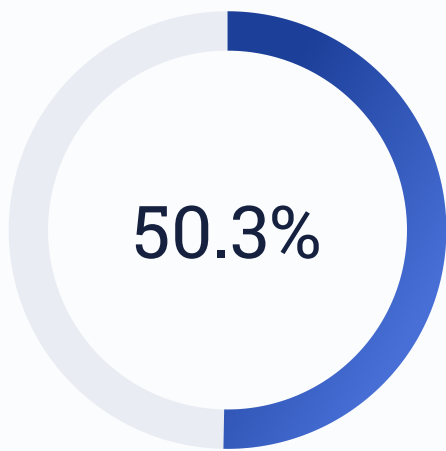

USD 50K–100K represents a feasible entry ticket to build and test the MVP in Dar es Salaam.
Goal: Prove traction with 10,000 tenants + 1,000 landlords in Year 1.

Revenue Projection (10,000 Tenants Base Case)

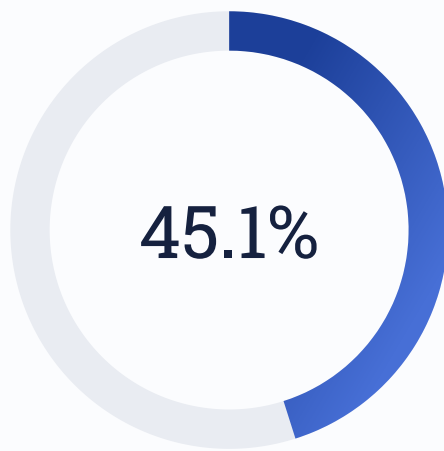

Subscription revenue: $10,000 \times \text{TZS } 10,000 = \text{TZS } 100\text{M/year}$ (~USD 40K)
Commission revenue (5% of avg. TZS 250K rent): **TZS 1.5B/year** (~USD 600K)
Total potential: ~TZS 1.6B (USD 640K) annually

Ubungo

Growing rental demand

"Today you may be owning physical assets. Tomorrow you can own the digital rental economy of Tanzania. Whoever controls rental data controls the housing economy. We do not plan to create a shop; but rather a platform. Once built, it prints cash without extra capital."
